EDUCATION

B.Tech in Computer Science and Engineering, Shri Ram Institute of Technology Jabalpur, CGPA – 8.1

2020- 2024

SKILLS

Programming Languages: Python, Java, JavaScript, HTML, CSS.

Databases: MongoDB, MySQL, SQL.

Frameworks: React JS, Express JS, Node JS, GraphQL.

Version Control Tools and IDE: Git, GitHub, Visual Studio Code, Postman, Apollo Server.

Subject: Basic knowledge of machine learning, reinforcement learning, and large language models (LLMs)

EXPERIENCE

Backend Developer Intern | Zool Tech Solutions Pvt Ltd

June 2025 – Present | Bangalore, India

- Collaborating with senior developers to build and maintain scalable backend services using **Node.js / Express.js**.
- Actively learning and implementing **GraphQL** APIs using **Apollo Server**.
- Developing and integrating **RESTful APIs** and working with **databases** like **MongoDB / MySQL**.
- Gaining hands-on experience in **version control** (Git), **deployment**, and **API testing** on Postman.

Summer Internship Program | Persistent

July 2023 - Sept 2023, Remote

- **Summer internship training program** designed to provide industry-aligned knowledge in key technical domains, including **Database Management Systems (DBMS)**, **Data Structures**, **Linux**, and **Python**.
- The program **aimed to bridge the gap between academic learning and industry requirements**, equipping participants with practical skills for real-world software development.
- Improved proficiency in **command-line tools**, **SQL queries**, and **Python scripting** through continuous mentorship and evaluations.

PROJECTS

BlogNest App | Blogging Website - [GitHub](#)

- A full-stack blog platform that allows users to **create, edit, delete, and read blogs** with real-time features and secure authentication.
- Designed and developed a scalable blog application using **NestJS** for backend and **React.js with Redux Toolkit** for frontend state management.
- Implemented **JWT-based authentication** (Login/Register) with protected routes.
- Used **MongoDB and Mongoose** for efficient data modeling and storage.
- **Tech Stack:** Node.js, Express.js, NestJS, MongoDB, Mongoose, React.js, Redux Toolkit, Tailwind CSS, JWT, REST API.

Auto-Attend | Automatic Attendance system - [GitHub](#)

- My contribution in this project was **managing the database**, ensuring efficient storage, retrieval, and processing of attendance records in **MongoDB** while optimizing data handling and performance.
- Auto-Attend is an **automatic attendance system** that utilizes face recognition technology to streamline attendance tracking. The system employs the **Face Recognition Library in Python** for facial detection and identification, eliminating the need for manual attendance marking.
- **Tech stack used: Full-Stack Development** using React.js, Express.js, MongoDB, Python (Face Recognition Library).

ACHIEVEMENTS & CERTIFICATION

- Hacker Rank | Demonstrated proficiency in **SQL** and **Python** through platform certifications. [LINK](#)
- **MERN Stack Web Development** Certification by Apna College. [LINK](#)
- Certified in **Structured Query Language (SQL)** by the **University of Michigan**. [LINK](#)
