EDUCATION

B.Tech in Computer Science and engineering, Shri Ram Institute Of Technology Jabalpur, **CGPA – 8.1** 2020 - 2024

SKILLS

Programming Languages: Python, JavaScript, CSS, HTML

Database and Language: MongoDB, MySQL, SQL

Frameworks and Operating Systems: Express JS, Node JS, Bootstrap.

Version Control Tools and IDE: Git, GitHub, Visual Studio Code, Microsoft excel, Microsoft Word

Soft Skills: Collaboration, Communication, Planning, Teamwork, Time Management

Training

Summer internship training program persistent July 2023 – Sept 2023, Remote

- **summer internship training program** designed to provide **industry-aligned knowledge** in key technical domains, including **Database Management Systems (DBMS), Data Structures, Linux, and Python**.
- The program aimed to **bridge the gap between academic learning and industry requirements**, equipping participants with
- practical skills for real-world software development.
- Certificate - [LINK](#)

Acmegrade Internship Program Acmegrade July 2022 – Sept 2022, Remote

- The program provided **foundational knowledge** in **Python, basic Data Science concepts, and raw data management** to help participants develop essential skills for data handling and analysis.
 - successfully completed the program were awarded a **certificate of completion**, recognizing their proficiency in Python, data science fundamentals, and data management skills.
- Certificate - [LINK](#)

PROJECTS

Auto-Attend | Automatic Attendance system - [GitHub](#)

- My contribution in this project was **managing the database**, ensuring efficient storage, retrieval, and processing of attendance records in **MongoDB** while optimizing data handling and performance.
- Auto-Attend is an **automatic attendance system** that utilizes **face recognition technology** to streamline attendance tracking. The system employs the **Face Recognition Library** in Python for facial detection and identification, eliminating the need for manual attendance marking.
- **Tech stack used:** Full-Stack Development with using React.js, Express.js, MangoDB, Python(Face Recognition Library)

Jarvis| Python Project - [GitHub](#)

- Jarvis is a **console-based AI assistant** that enables users to control their computer system using **voice commands and gesture movements**. The system leverages **Machine Learning and AI** to interpret user inputs efficiently, enhancing interaction and automation.
- Your role in the 'Jarvis' project includes designing, coding, and integrating the Machine Learning and AI components that enable voice and gesture-based control
- **Tech stack used:** this is a python based project with using Voice Recognition, Gesture Recognition.

ACHIEVEMENTS

- **Hacker Rank** | I have good knowledge in **SQL and Python**. [_LINK](#)
- I am certified in **Structured Query Language (SQL)** by **University of Michigan**. [LINK](#)
- I am certified in **Microsoft Excel** by **Simplilearn & skillUp**. [LINK](#)
