EDUCATION

B. Tech in Computer Science and Engineering, Shri Ram Institute of Technology Jabalpur, **CGPA – 8.1** Aug 2020 - June 2024

SKILLS

Programming Languages: Python, JavaScript/ Typescript, HTML, CSS.

Databases: MongoDB, SQL.

Frameworks: React JS, Next JS, Express JS, Node JS, GraphQL, Tailwind.

Version Control Tools and IDE: Git, GitHub, Visual Studio Code, Postman, Apollo Server.

Subject: Basic knowledge of AI, machine learning, reinforcement learning, and large language models (LLMs)

EXPERIENCE

Full stack developer | Zool Tech Solutions Pvt Ltd

Jan 2025 – Present | Bangalore, India

- Working as a **Full Stack Developer** with approximately **1 year of hands-on experience** in full-stack development.
- Collaborating with senior developers to design, build, and maintain backend services using **Node.js and Express.js**.
- Actively contributed to **2–3 client-facing and internal projects**, supporting end-to-end feature development.
- Worked with multiple technologies including **Node.js, Express.js, React.js, Next.js, MongoDB, REST & GraphQL APIs**.
- Experience includes **internal company products** as well as a **live global enterprise application**.
- Gaining hands-on experience with **Git-based version control, API testing using Postman**, and **application deployment workflows**.

Internship Training Program | Persistent

July 2024 - Dec 2024, Remote

- Completed an industry-aligned internship program focused on strengthening **core software engineering fundamentals and practical technical skills**.
- Gained hands-on knowledge in **Database Management Systems (DBMS), Data Structures, Linux, and Python**, with emphasis on real-world application.
- Enhanced readiness for real-world projects by learning industry standards, workflows, and best practices used in enterprise software development.

PROJECTS

Comm-IT HRMS (Global Live Project) | Human Resource Management System (HRMS) - [GitHub](#)

- Worked on a **live global HRMS application** used for managing employees, roles, attendance, and HR operations.
- Developed and maintained **backend services** using **Node.js, Express.js, MongoDB**, and **GraphQL APIs**.
- Designed **GraphQL schemas, queries, mutations, and resolvers** to fetch and manage HR-related data efficiently.
- Implemented **secure authentication and role-based authorization** (Admin/User) using **JWT**.
- Optimized MongoDB queries and handled complex data fetching logic for scalable performance.
- Collaborated with frontend teams to ensure smooth API integration.

Time-Tracker Application | Timesheet Management Applications - [GitHub](#)

- **Developed a full-stack time tracking system** using **MongoDB, Express.js, Next.js, and Node.js** to streamline project and timesheet management.
- **Implemented authentication & authorization** with **role-based access control (RBAC)** ensuring secure access for different user roles. Three distinct roles with permissions: **Admin:** Full access, **Project Manager:** their own projects and **User:** Limited access to assigned projects.
- **Dynamic project schema design** allowing flexible timesheet fields tailored per project requirements
- **Responsive frontend with React & Tailwind CSS**, ensuring usability across desktop, tablet, and mobile devices.

ACHIEVEMENTS & CERTIFICATION

- **Hacker Rank** | Demonstrated proficiency in **SQL** and **Python** through platform certifications. [LINK](#)
- **MERN Stack Web Development** Certification by **Apna College**. [LINK](#)
