EDUCATION

B.Tech in Computer Science and engineering, Shri Ram Institute Of Technology Jabalpur, CGPA – 8.1 2020- 2024

SKILLS

Programming Languages: Python, Java, JavaScript, HTML, CSS.

Database and Language: Experience in Mongo DB, MySQL, SQL

Frameworks: working experience in React JS, Express JS, Node JS, Bootstrap.

Version Control Tools and IDE: Git, GitHub, Visual Studio Code.

Subject: Basic knowledge About Machine Learning, Reinforcement Learning, LLM.

Soft Skills: Collaboration, Planning, Teamwork, Time Management, Leadership.

Training

Summer internship training program Persistent July 2023 – Sept 2023, Remote

- **summer internship training program** designed to provide industry-aligned knowledge in key technical domains, including **Database Management Systems (DBMS), Data Structures, Linux, and Python.**
- The program **aimed to bridge the gap between academic learning and industry requirements**, equipping participants with practical skills for real-world software development.
- Certificate - [LINK](#)

Acmegrade Internship Program Acmegrade July 2022 – Sept 2022, Remote

- The program provided foundational knowledge in **Python, basic Data Science concepts**, and raw data management to help participants develop essential skills for data handling and analysis.
- successfully completed the program were awarded a certificate of completion, recognizing **their proficiency in Python**, data science fundamentals, and **data management skills.**
- Certificate - [LINK](#)

PROJECTS

Task Management System – [GitHub](#)

- Developed a **full-stack task management** web application enabling users to create, update, assign, and track tasks across teams. Key features include **user authentication (JWT), real-time task updates**, role-based access, **task filtering/sorting, and an intuitive dashboard UI.**
- Designed and implemented **RESTful APIs** for robust **backend integration**, and deployed the project **on Vercel** for seamless access and scalability.
- **Tech stack used: Full-stack Development** with using Next.js, Node.js (Express), MongoDB, Tailwind CSS, JWT, Vercel.

Auto-Attend | Automatic Attendance system - [GitHub](#)

- My contribution in this project was **managing the database**, ensuring efficient storage, retrieval, and processing of attendance records in **MongoDB** while optimizing data handling and performance.
- Auto-Attend is an **automatic attendance system** that utilizes face recognition technology to streamline attendance tracking. The system employs the **Face Recognition Library in Python** for facial detection and identification, eliminating the need for manual attendance marking.
- **Tech stack used: Full-Stack Development** with using React.js, Express.js, MangoDB, Python(Face Recognition Library)

ACHIEVEMENTS & Certification

- **Hacker Rank** | I have good knowledge in **SQL** and **Python.** [LINK](#)
- **MARN Stack Web development** certification by Apna Collage. [LINK](#)
- I am certified in **Structured Query Language (SQL)** by University of Michigan. [LINK](#)
